https://leetcode.com/u/Adarsh_kumar073/

PROFILE

Software Engineer with a strong foundation in Data Structures, Algorithms, and Machine Learning. Proficient in Python, C++, SQL, and experienced with BFS, Dijkstra's Algorithm, Neural Networks, and NLP. Passionate about solving complex software challenges and optimizing solutions with FastAPI, AWS, and WebSockets.

EDUCATION

B. Tech.

JNU, New Delhi (2023-2027)

Coursework: Data Structures, Algorithms, DBMS, Machine Learning, Software Engineering

TECHNICAL SKILLS

- **Languages:** Python, C++
- **Databases:** MySQL
- **Machine Learning:** Scikit-learn, Neural Networks, SVM, Decision Trees, NLP
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Frameworks & Tools:** FastAPI, WebSockets, AWS, NLP (spaCy, NLTK)

LEETCODE & COMPETITIVE PROGRAMMING

- Solved 300+ LeetCode problems with 70% acceptance rate.
- Strong command over Graphs (BFS, Dijkstra), Linked Lists, Trees, D.P., and SQL queries.

 https://leetcode.com/u/Adarsh_kumar073/

PROJECTS

1. RESUME SHORTLISTING USING NLP & MACHINE LEARNING

FEBRUARY 2025(WORKING)

- Developing an AI-powered resume shortlisting model using NLP & ML algorithms.
- Utilized spaCy, NLTK, and TF-IDF vectorization for text processing.
- Built a classification model with Naive Bayes, SVM and KNN to classify resumes.

 <https://github.com/Adarsh-Kumar073/Resume-Classifier>

2. MEAN REVERSION TRADING STRATEGY

NOV 2024- JAN 2025

- Implemented a Mean Reversion Strategy using Maxwell Distribution.
- Coded in Python, used Pi42 APIs, and deployed on AWS EC2.

 [Mean-Reversion-Strategy-using-Maxwell-Distribution](#)

3. BANGALORE HOUSE PRICE PREDICTION

AUG 2024- OCT 2024

- Built an ML model to predict house prices using Linear Regression.
- Used Pandas, NumPy, Matplotlib, and deployed with FastAPI.

 github.com/Bangalore-House-Price-Prediction

SOFT SKILLS

- Critical Thinking
- Communication Skills
- Problem Solving
